

The power of smart ingredients

Silicones
for
personal
care

A superior combination of product supply regularity and competitive pricing

BRB Silicones, a business unit of BRB International B.V., It produces speciality silicones like emulsions, antifoams, water repellants, elastomers, lubricants, silanes, resins, dimethicone & Cyclomethicone blends, dimethicone polyols, cross polymers and many more customised products. BRB Silicones also supplies an extensive range of core and speciality intermediates to the silicone industry with a superior combination of product supply regularity and competitive pricing.

With an extensive experience in silicones, BRB is the largest independent producer in the world and has gained a unique supplier position in Personal Care:

- We offer a wide range of cost-effective ingredients
- We have demonstrated over the years the ability to supply in all situations
- We have much broader customisation flexibility than the other silicone majors
- We give you the possibility to eliminate most of your single sourcing issues

Acne Care Gel Cream Moisturiser

Acne Care Gel Cream Moisturiser is designed for oily, and acne-prone skin. It improves the skin's overall appearance, reduces acne and blemishes, and evens out the skin texture, making skin soft and smooth. It is a lightweight and fast-absorbing formulation.

Featuring

- BRB 526 : Wetting agent and stabilising the emulsion
- BRB DM 5 : Aids in spreadability. Provides light emollience to skin
- BRB PMS-2 : Aids in sebum absorption and provides a matt effect with silky touch
- BRB SG 528 : Provides excellent velvet and intense after-feel.

Procedure

- 1) Weigh phase A and mix well.
- 2) Premix phase B. Then add into bulk and mix well.
- 3) In a separate beaker, prepare phase C.
- 4) Add step 3 into step 2.
- 5) Add D and homogenize well.
- 6) Add in E1 and E2. Mix well after each addition.

Typical properties / Additional information

- Appearance : Light yellow cream
- Sensory attributes : Light and non-greasy feel

No	Ingredients (Suppliers)	INCI	Dosage (%)

AHA Renewing Cream

AHA Renewing Cream is an O/W AHA exfoliant cream formulation that visibly smooths rough, bumpy, crepey skin while moisturizing with avocado oil and renewing the skin barrier with Japonica Bud Extract. It provides a consistent, gentle exfoliation to help improve visible signs of ageing, including dullness and discolouration.

Featuring

BRB DM 350 : Aids in spreadability and emolliency
BRB Caprylyl Methicone : Helps spreadability and lubricity
BRB 2895 : Provides light emolliency to skin

Procedure

- 1) Dissolve EDTA into water and pre-disperse A3, A4 and A5. Add all ingredients to the water and mix well by using a high-speed mixer. Heat up to 75°C.
- 2) In a separate beaker, prepare phase B and heat up to 75°C.
- 3) Add phase B into phase A under high mixing speed for 10 min at 75°C.
- 4) Cool the mixture under normal speed mixing to 50°C.
- 5) Prepare phase C and add to the main beaker at 50°C.
- 6) Add phase D one by one into bulk below 40°C. Mix well.
- 7) Cool to room temperature while mixing. Adjust pH if needed.

Typical properties / Additional information

Appearance : Soft white emulsion
Sensory attributes : Easy to absorb, light feel

No	Ingredients (Suppliers)	INCI	Dosage (%)

Anti-maskné Protective Lotion

Anti-maskné Protective Lotion is a refreshing gel cream which hydrates and prevents imperfections. It is an oil-free formula which protects skin from friction and leaves pores to breathe.

Featuring

- BRB 6340 : Co-emulsifier
- BRB 423 : Emulsifier
- BRB SG 516 : Velvety and powdery feel
- BRB DM 66 : Improves spreadability
- BRB 1860 : Aids in emolliency, reducing tackiness

Procedure

- 1) Combine phase A.
- 2) Combine phase B.
- 3) Emulsify pouring B into A slowly under mixing.
- 4) Add C and D.
- 5) Homogenize.

Typical properties / Additional information

- Appearance : White creamy emulsion
- Sensory attributes : Silky and fresh. Easy to absorb. Not greasy.

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	BRB 6340	PEG-10 Dimethicone	1.00
A2	BRB 423	Cetyl PEG/PPG-10/1 Dimethicone	1.50

D1	Cherry Beeswax nat	Parfum	0.15

Anti-maskné Restoring Cream

Anti-maskné Restoring Cream strengthens the lipid barrier without clogging pores. It moisturizes, calms skin and controls blemishes.

Featuring

- BRB 2836 : Provides melting texture.
- BRB 423 : Emulsifier.
- BRB Caprylyl Methicone : Improves spreadability and silkiness.
- BRB SG 516 : Gives excellent velvet and powdery feel.
- BRB 1861 : Aids in emolliency, reducing tackiness and greasiness.

Procedure

- 1) Combine phase A
- 2) Combine phase B
- 3) Emulsify pouring B into A slowly under mixing.
- 4) Add C and D.
- 5) Homogenize.

Typical properties / Additional information

Appearance : White fluid emulsion
Sensory attributes : Silky and fresh. Slightly emollient.

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	BRB 2836	Stearyl Dimethicone (and) Octadecene	1.00
A2	BRB 423	Cetyl PEG/PPG-10/1 Dimethicone	2.00
A3	BRB SG 516	Dimethicone (and) Dimethicone/ Vinyl Dimethicone Crosspolymer	2.00
A4	BRB Caprylyl Methicone	Caprylyl Methicone	5.00
A5	BRB 1861	C11-13 Isoparaffin (and) Dimethiconol (and)	3.00
B1	DI Water	Aqua	82.15
B2	Palmera G995E	Glycerin	3.00
B3	Salt	Sodium Chloride	1.00
B4	Primalhyal 300	Hydrolyzed Hyaluronic Acid	0.10
C1	Geogard 221	Dehydroacetic Acid (and) Benzyl Alcohol	0.60
D1	Fresh nat	Parfum	0.15

Aqua Boost Cream

Aqua Boost Cream is a water-in-silicone emulsion which provides extra hydration to your skin. Rubbing it onto your skin gives a cooling sensation and refreshes your skin.

Featuring

- BRB 423 : Acts as water-in-silicone emulsifier.
- BRB 2835 : Provides excellent lubricity, emolliency and shine.
- BRB DM 10 : Aids in spreadability. Provides emolliency to skin.
- BRB CM 50 : Provides light and dry skin feel.
- BRB SG 106 : Provides excellent velvet and intense after feel.
Also helps to build up viscosity.

Procedure

- 1) Add phase A into bulk and mix well.
- 2) In a separate beaker, add phase B. Mix well.
- 3) Add step 2 slowly into step 1. Homogenize well.
- 4) Add C1 into bulk and mix well.

Typical properties / additional information

- Appearance : White cream
- Sensory attributes : Light, soft and hydrated

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	BRB 423	Cetyl PEG/PPG-10/1 Dimethicone	1.50
A2	BRB 2835	Cetyl Methicone	1.00

B2	Salt	Sodium Chloride	1.00
B3	Propylene Glycol	Propylene Glycol	2.00
C1	Preservative		q.s

Glow Cherie Cream

Glow Cherie Cream is an O/W formula which helps make skin appear younger-looking and healthier with a natural dewy finish. It is an illuminating pearlescent cream formula that creates a flawless glowing look on the skin. It can be used over, underneath or mixed with your foundation to give your skin an undeniable healthy-looking glow.

Featuring

BRB CM 50 : Aids in spreadability and emolliency.
 BRB 2835 : Helps spreadability and lubricity.
 BRB DM 5 : Aids in spreadability. Provides light emolliency.
 BRB PMS-5 : Fills into fine lines to provide smooth surface.

Procedure

- 1) Prepare phase A and disperse for 10 min. Heat up to 70-75°C.
- 2) In a separate beaker, prepare phase B and heat up to 70-75°C.
- 3) Under mixing, add phase B to phase A at 70-75°C for 10 min.
- 4) Cool under mixing and add C, D and E below 40°.

Typical properties / Additional information

Appearance : Pearly viscous liquid
 Sensory attributes : Easy to absorb, light feel

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	Water	Aqua	55.90
A2	WeylCare ATBS	Ammonium Polyacryloyldimethyl Taurate	0.30
A3	Glycerine	Glycerine	2.00

Guide formulation

16

Hydra Hemp Day Cream

Hydra Hemp Day Cream is a face moisturiser that reduces the look of lines and wrinkles and gives your skin a youthful glow. It balances and provides long-term hydration and a healthy look.

Featuring

- BRB 1860 : Provides emolliency and smooth feeling.
BRB DM 55 : Provides spreadability and light sensory.
BRB PMS-5 : Reduces wrinkles and fine lines.

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	DI Water	Aqua	67.30
A2	Glycerine	Glycerine	3.00
B1	Palmerol 68/30F	Cetearyl Alcohol	3.00
B2	Palmerol 16/98F	Cetyl Alcohol	1.00
B3	Massocare GMS 165	Glyceryl Stearate (and) PEG-100 Stearate	3.50
B4	Hemp oil	Cannabis Sativa Seed Oil	3.00
B5	Bioxan E Acetate 1000 U	Tocopheryl Acetate	0.05
C1	BRB 1860	Dimethicone (and) Dimethiconol	5.00
C2	BRB DM 55	Dimethicone	10.00
C3	BRB PMS-5	Polymethylsilsesquioxane	3.00
D1	C39-A220 FD&C Blue 1	CI 42090	q.s
E1	Sharomix EG-14	Phenoxyethanol (and) Ethylhexylglycerin	1.00
F1	Herbafresh 8615/10	Parfum	0.15

Procedure

- 1) Weigh and heat phase A at 80°C
- 2) Weigh and heat phase B at 80°C
- 3) Emulsification process under heat
- 4) Add Sharomix under 30°C and leave it cool down
- 5) Add F and D in cold conditions

Typical properties / Additional information

Appearance : Green fluid cream
Sensory attributes : Moisturizing, soft focus

Face Care

Guide formulation

17

Magic Water Bead Cream

Magic Water Bead Cream is a water-in-silicone emulsion that hydrates your skin. Rubbing it onto your skin forms a water drop on your skin.

Featuring

- BRB 6373 : Acts as water-in-silicone emulsifier.
BRB CM 56-S: Provides light and dry skin feel.
BRB SG 506 : Provides excellent powdery and smooth skin feel.
Also helps to build up viscosity.
BRB DM 10 : Aids in spreadability. Provides emolliency to skin

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	DI water	Aqua	79.00
A2	Sodium Chloride	Sodium Chloride	1.00
A3	Glycerin	Glycerin	5.00
B1	BRB 6373	Cyclopentasiloxane (and) PEG/PPG-18/ 18 Dimethicone	5.50
B2	BRB CM56-S	Cyclopentasiloxane (and) Cyclohexasiloxane	5.00
B3	BRB SG 506	Dimethicone (and) Dimethicone/ Vinyl Dimethicone Crosspolymer	1.50
B4	BRB DM 10	Dimethicone	3.00
C1	Preservative		q.s

Night Recovery Comfort Cream

Night Recovery Comfort Cream is a water-in-silicone oil emulsion which provides extra hydration to your skin overnight. It moisturizes skin for hours after hours while sleeping to reduce the appearance of fine lines and wrinkles.

Featuring

- BRB 423 : Acts as water-in-oil emulsifier.
- BRB DM 5 : Aids in spreadability. Provides emolliency to skin.
- BRB 1834 : Imparts a silky feel, lubricious feel to the skin
- BRB CM 50 : Provides light and dry skin feel.
- BRB SG 116 : Provides excellent velvet and intense after feel.
Also helps to build up viscosity.

Procedure

- 1) Add phase A into a beaker and heat up to 70-75°C.
- 2) In a separate beaker, heat up phase B to 70-75°C.
- 3) Add phase A slowly into B and homogenize well.
- 4) Premix phase C.
- 5) Cool bulk to 60°C. Add premix into bulk and homogenize well.
- 6) Cool bulk to 40°C. Add phase D one by one. Mix well after each addition.

Typical properties / Additional information

- Appearance : Light yellowish cream
- Sensory attributes : Soft and hydrated

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	DI Water	Aqua	65.00
A2	Glycerin	Glycerin	2.00

D2	Algisium C	Methylsilanol Mannuronate	3.00

Perfect Age Defense Moisturiser

Perfect Age Defense Moisturiser is an oil-in-water emulsion which treats signs of ageing. It moisturises and renews the look of skin throughout the day and helps to smooth wrinkles. Skin is left feeling smooth and looking younger.

Featuring

- BRB PTM 20 : Provides emolliency and shininess to skin.
- BRB DM 100 : Aids in spreadability. Provides emolliency to skin.
- BRB 1838 : Imparts a silky feel, lubricious feel to the skin.
- BRB SG 506 : Provides excellent powdery and smooth skin feel.
Also helps to build up viscosity.

Procedure

- 1) Add phase A into bulk. Mix well. Heat up to 70-75°C.
- 2) In a separate beaker, add phase B. Then, heat up to 70-75°C.
- 3) Add phase B into A and homogenize well.
- 4) Premix phase C1 and C2. At 60°C, add into bulk. Mix well.
- 5) Add C3 into bulk. Homogenize well.
- 6) Add D1-D5 one by one into bulk. Mix well.

Typical properties / additional information

Appearance : White cream

Sensory attributes : Good spreadability, soft skin feel

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	DI Water	Aqua	70.60
A2	Tetrasodium EDTA	Tetrasodium EDTA	0.10
A3	Glycerin	Glycerin	2.00

Perfectly Clear Gel Moisturiser

Perfectly Clear Gel Moisturiser is a clear water-in-silicone emulsion which provides hydration to your skin. It makes skin soft and supple after application.

Featuring

- BRB 6373 : Acts as a water-in-silicone emulsifier.
 BRB CM 56-S : Provides light and dry skin feel.
 BRB SG 506 : Provides excellent powdery and smooth skin feel.
 Also helps to build up viscosity.
 BRB DM 10 : Aids in spreadability. Provides emolliency to skin.

Procedure

- 1) Mix well A1-A4. Measure refractive index of phase A
- 2) Mix B1-B4 separately. Measure refractive index of phase B. Match the refractive of two phases. Add DI water into phase B to decrease refractive index or add Propylene Glycol to increase refractive index.
- 3) Add phase B slowly into phase A while stirring.
- 4) Add C1 into bulk and mix well.

Typical properties / additional information

- Appearance : Clear gel
 Sensory attributes : Light and non-tacky

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	BRB 6373	Cyclopentasiloxane (and) PEG/ PPG-18/ 18 Dimethicone	5.50
A2	BRB CM56-S	Cyclopentasiloxane (and) Cyclohexasiloxane	5.00
A3	BRB SG 506	Dimethicone (and) Dimethicone/ Vinyl Dimethicone Crosspolymer	1.50
A4	BRB DM 10	Dimethicone	3.00
B1	DI water	Aqua	36.89
B2	Sodium Chloride	Sodium Chloride	1.00
B3	Propylene Glycol	Propylene Glycol	46.01
B4	Phenoxyethanol	Phenoxyethanol	1.00
C1	Goldmann Silicone	Parfum	0.10

Pro-aging Restore Night Cream

Pro-aging Restore Night Cream delivers essential nutrients and nurtures the skin for a dewy, cushioned glow by morning. It provides elasticity by visibly improving texture and suppleness.

Featuring

- BRB 2836 : Provides emolliency, rich texture, increases viscosity.
- BRB DM 66 : Provides spreadability.
- BRB PMS-5 : Wrinkle and fine lines reduction.

Procedure

- 1) Weigh and heat phase A at 80°C
- 2) Weigh and heat phase B at 80°C
- 3) Emulsification process under heat
- 4) Slightly heat phase C and add in agitation
- 5) Add D and E under 30°C

Typical properties / Additional information

- Appearance : Rich white cream
- Sensory attributes : Suppleness, elasticity

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	DI Water	Aqua	62.80
A2	Glycerine	Glycerine	3.00
B1	Palmerol 68/30F	Cetearyl Alcohol	4.00

Revitalizing Detox Cream

Revitalizing Detox Cream is a water-in-oil emulsion which detoxifies skin and protects it from environmental stress. It lubricates with natural lipids, detoxifies with plant extracts and protects from external aggressions by creating a non-occlusive breathable barrier.

Featuring

BRB 423	: Water-in-oil emulsifier
BRB DM 2	: Provides light emolliency
BRB Caprylyl Methicone	: Helps spreadability and lubricity
BRB PMS-5	: Provides soft focus anti-wrinkle effect
BRB SG 516	: Gives velvety and powdery feel

Procedure

- 1) Weigh SG 516 with 423 and mix with a magnetic stirrer, then add the rest of the silicone phase.
- 2) Add the rest of phase A and heat up to 60°C.
- 3) Weigh phase B until homogenization and heat up to 60°C.
- 4) Place phase A into mixer and begin pouring phase B little by little, forming emulsion.
- 5) Once emulsion is formed, add phases C and D.
- 6) Pass it through Silverson (3000 rpm) for 3 minutes or turrax

Typical properties / Additional information

Appearance	: White creamy lotion
Sensory attributes	: Easy to spread, silky rich touch

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	BRB 423	Cetyl PEG/ PPG-10/ 1 Dimethicone	2.50

Skin Calming Hydration Cream

Skin Calming Hydration Cream provides long-term moisture for dry, itchy skin. It contains centella asiatica extract which helps to soothe and clarify skin while reducing blemishes, leaving skin refreshed and resilient.

Featuring

BRB 423	: Acts as water-in-oil emulsifier
BRB DM 55	: Aids in spreadability. Provides light emolliency to skin
BRB 2836	: Provides emolliency with good compatibility with many organic ingredients. Used for melting wax
BRB SG 528	: Provides excellent velvety and intense after feel
BRB Caprylyl Methicone	: Improves spreadability and silkiness
BRB 6340	: Acts as water-in-silicone emulsifier

Procedure

- 1) Add phase A into a beaker and mix well.
- 2) In a separate beaker, mix phase B well.
- 3) Add phase A slowly into phase B. Homogenize well.
- 4) Add C1-C5 one by one into bulk. Mix well.

Typical properties / Additional information

Appearance	: White cream
Sensory attributes	: Easy to spread, non-greasy feel

No	Ingredients (Suppliers)	INCI	Dosage (%)

Skin Melting Cream

Skin Melting Cream is a water-in-oil emulsion that melts and wraps the skin in ultimate moisture. This luxuriously rich cream forms a protective veil to retain moisture from the skincare you used before the cream. It covers the skin in total moisture, resulting in a smoother, hydrated, soft skin feel.

Featuring

BRB 2836 : Provides emolliency to skin.
 BRB 423 : Acts as water-in-oil emulsifier.
 BRB Caprylyl Methicone : Provides unique light and smooth skin feel.
 BRB DM 5 : Aids in spreadability. Provides emolliency to skin.
 BRB SG 250 : Provides excellent powdery and smooth skin feel.

Procedure

- 1) Heat phase A1-A7 to 80-85°C.
- 2) Premix phase B.
- 3) Add step 2 into step 1.
- 4) In a separate beaker, heat C1-C4 to 80-85°C.
- 5) Add step 4 into step 3 slowly. Homogenize well.
- 6) Cool bulk to 45°C. Add D1 into bulk. Mix well.

Typical properties / Additional information

Appearance : White cream
 Sensory attributes : Rich and silky feel

Skin Tightening Cream Gel

Skin Tightening Cream Gel is a light cream-gel face moisturiser with anti-ageing ingredients for visible skin improvement. A tightening cream-gel helps to firm, contour, and brighten the look of skin while stimulating natural cell activity to help restore the appearance of skin's elasticity, resilience, tone, and texture.

Featuring

BRB 526 : Acts as surface tension depressant and wetting agent.
 BRB SG 528 : Provides excellent powdery and smooth skin feel.
 BRB Caprylyl Methicone : Provides unique light and smooth skin feel
 BRB DM 5 : Provides emolliency to skin.

Procedure

- 1) Add A1-A4 into a beaker and mix well.
- 2) In a separate beaker, add B1-B4. Mix well.
- 3) Add step 2 into step 1. Homogenize well.
- 4) Add C1 into bulk. Mix well.
- 5) Then, add C2 into bulk. Mix well.

Typical properties / additional information

Appearance : White cream gel
 Sensory attributes : Smooth and hydrated

No	Ingredients (Suppliers)	INCI	Dosage (%)

S.O.S Anti-mask Moisturising Cream

S.O.S Anti-mask Moisturising Cream is a water-in-oil emulsion which provides intense moisture to help relieve extra-dry skin and restore the skin's moisture barrier. An anti-pimple day cream contains ingredients that protect and nourish the complexion in the perfect combination.

Featuring

- BRB 423 : Acts as emulsifier.
- BRB DM 55 : Aids in spreadability. Provides emolliency to skin.
- BRB SG 106 : Provides excellent velvet and intense after-feel.
Also helps to build up viscosity.
- BRB 2835 : Good compatibility with many organic cosmetic ingredients.
Provides emolliency.
- BRB PMS-5 : Provides soft focus and anti-wrinkle effect. Provides oil absorption.

Procedure

- 1) Mix A1-A3 well.
- 2) In a separate beaker, mix B1-B7 well.
- 3) Homogenize well to make sure all powders are well dispersed.
- 4) Add step 1 into step 3 slowly while mixing.
- 5) Prepare phase C and add into the emulsion. Mix well.
- 6) Add D1 & D2 into bulk and mix well.

Typical properties / Additional information

- Appearance : White cream
- Sensory attributes : Light, powdery skin feel

No	Ingredients (Suppliers)	INCI	Dosage (%)

Ultra Light & Powdery Cream Gel Moisturiser

Ultra Light & Powdery Cream Gel Moisturiser is a silicone-in-water emulsion that hydrates your skin. It absorbs instantly, making the skin soft, supple, and giving a powdery after-feel.

Featuring

- BRB CM 50 : Provides light and non-greasy after feel.
- BRB 526 : Acts as surface tension depressant and wetting agent.
- BRB PMS-5 : Provides excellent soft, smooth and dry feel.
- BRB SG 506 : Provides excellent powdery and smooth skin feel.
Also helps to build up viscosity.

Procedure

- 1) Add phase A into bulk and mix well.
- 2) In a separate tank, prepare phase B.
- 3) Add phase B into A and homogenize.
- 4) Then, add in C1 and homogenize well.
- 5) Add D1-D3 one by one into bulk. Mix well after each addition.

Typical properties / Additional information

- Appearance : White cream
- Sensory attributes : Light, powdery feel

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	BRB CM 50	Cyclopentasiloxane	12.00
A2	BRB 526	PEG-12 Dimethicone	4.00
A3	BRB PMS-5	Polymethylsilsesquioxane	2.00

Water Essence Cream

Water Essence Cream is an oil-in-water emulsion which provides hydration the skin. It provides a superior light and cooling sensation during application.

Featuring

BRB CM 56-S : Provides light and dry skin feel.

BRB DM 10 : Aids in spreadability. Provides emolliency to skin.

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	DI water	Aqua	85.15
A2	Glycerin	Glycerin	5.00
B1	Viscolam AT 100P	Sodium Polyacryloyldimethyl Taurate (and) Hydrogenated Polydecene (and) Trideceth-10	1.85
B2	BRB CM56-S	Cyclopentasiloxane (and) Cyclohexasiloxane	5.00
B3	BRB DM 10	Dimethicone	3.00
C1	Preservative		q.s

Procedure

- 1) Mix A1 & A2.
- 2) Add B1 into bulk and mix well. It forms a translucent cream gel.
- 3) Then, Add B2 and B3 one by one into bulk. And homogenize well.
- 4) Add C1 into bulk and mix well.

Typical properties / Additional information

Appearance : Translucent gel cream

Sensory attributes : Light, cooling sensation

Water Splash Essence II

Water Splash Essence II is a water-in-silicone emulsion to moisturise the skin. It is a lightweight cream that helps replenish and moisturise skin, producing hydrated, smooth, supple skin. It is easily absorbed into the skin, leaving you with a fairer complexion. It can be used as a primer for make-up.

Featuring

BRB Caprylyl Methicone : Provides excellent lubricity, emolliency and shine.

BRB DM 2 : Provides light and dry skin feel.

BRB SG 506 : Provides excellent powdery and smooth skin feel.
Also helps to build up viscosity.

BRB 423 : Acts as water-in-silicone emulsifier.

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	DI Water	Aqua	69.80
A2	Propylene Glycol	Propylene Glycol	10.00
A3	Sodium Chloride	Sodium Chloride	1.00
A4	Euxyl PE 9010	Phenoxyethanol (and) Ethylhexylglycerin	0.80
B1	BRB Caprylyl Methicone	Caprylyl Methicone	5.00
B2	BRB DM 2	Dimethicone	4.00
B3	FAS70USI-E	Titanium Dioxide (and) Cyclopentasiloxane (and) PEG/PPG-18/18 Dimethicone (and) Triethoxycaprylylsilane (and) Tocopherol Acetate	1.50
B4	BRB SG 506	Dimethicone (and) Dimethicone/Vinyl Dimethicone Crosspolymer	7.00
B5	BRB 423	Cetyl PEG/PPG-10/1 Dimethicone	0.90

Procedure

- 1) Add A1-A4 into beaker. Mix well.
- 2) In a separate beaker, mix B1-B5 well.
- 3) Add step 1 into step 2 slowly. Homogenize well.

Typical properties / Additional information

Appearance : White cream

Sensory attributes : Light, soft and hydrated

After Sun Body Repair Cream

After Sun Body Cream is an O/W cream to soothe the discomfort of the skin due to sun exposure, it also rehydrates, helping to prevent cutaneous dryness caused by sun exposure. It is a non-greasy and fast-absorbing formulation.

Featuring

- BRB 2836 : Provides emolliency with good compatibility with many organic ingredients. Used for melting wax.
- BRB 1736 : Emollient providing silky feel.
- BRB DM 100 : Aids in spreadability. Provides emolliency to skin.
- BRB Caprylyl Methicone : Provides unique light and smooth feel.
- BRB DM 55 : Provides light and dry skin feel.
- BRB SG 528 : Provides excellent velvety and intense after feel.

Procedure

- 1) Add A2 into A1. Mix well.
- 2) Premix A3 & A4. Add into step 1 and mix well. Heat to 70-75°C.
- 3) In a separate beaker, add B1-B7 and heat to 70-75°C.
- 4) Add step 3 into step 2. Homogenize well.
- 5) Premix C1 & C2. Add premix into bulk. Mix well.
- 6) At <40°C, add D1-D5 into bulk. Mix well after each addition.

Typical properties / Additional information

- Appearance : White cream
- Sensory attributes : Rich and non-greasy

No	Ingredients (Suppliers)	INCI	Dosage (%)

After Sun Relief Lotion

After Sun Relief Lotion is a non-greasy refreshing moisturizer which soothes the skin after sun exposure.

Featuring

- BRB 423 : Emulsifier.
- BRB SG 516 : Sensory enhancer and stability controller.
- BRB 2835 : UV filter booster.
- BRB DM 5 : Improves spreadability

Procedure

- 1) Combine crosspolymer with emulsifier. Then add the rest of phase A and mix well.
- 2) In a separate beaker, weight phase B and mix well.
- 3) Emulsify adding phase B to A slowly by mixer.
- 4) Place into Silverson for 1-2 minutes at high shear.
- 5) Add preservative and perfume.

Typical properties / Additional information

- Appearance : Translucent white emulsion
- Sensory attributes : Refreshing and calming

No	Ingredients (Suppliers)	INCI	Dosage (%)

Barrier Body Cream with Multi-vitamin

Barrier Body Cream with Multi-Vitamin is a fast absorbing, velvety feel, multi-vitamin all-over body cream which is enriched with shea butter, moisturizing oil and Vitamin A, E and B3. It helps to intensely nourish, protect, and restore skin's hydrolipidic film.

Featuring

BRB DM 5 : Aids in spreadability. Provides light emolliency to skin.

BRB SG 516 : Provides excellent velvety and intense after feel.
Also helps to build up viscosity.

Procedure

- 1) Add A1-A4 into beaker and heat to 75°C.
- 2) Prepare phase B in a separate beaker and heat to 75°C.
- 3) Add phase B into phase A and homogenize with vacuum under rotor-stator mixing for 5 minutes.
- 4) Cool down to 60°C.
- 5) Premix phase C and heat to 60°C and add into the main beaker.
- 6) Prepare phase D and add into the bulk and homogenize for 2 minutes.
- 7) Cool down to room temperature whilst slow agitation.
- 8) Add phase E and homogenize intensively again. Adjust pH between 5-5.5.

Typical properties / Additional information

Appearance : White opaque viscous liquid

Sensory attributes : Light, non-greasy

No	Ingredients (Suppliers)	INCI	Dosage (%)

The formulation is developed with the support of Azelis Turkey.

Body Bronzer & Contour

Body Bronzer & Contour is an anhydrous formulation which gives a radiant, summer tan while also nourishing and moisturizing the skin.

Featuring

BRB Color Lock : Film former. Provides color transfer resistance and long-lasting effect.
BRB PTM 20 : Provides emolliency and shininess to skin
BRB CM 50 : Aids in spreadability. Provides light emolliency to skin.
BRB DM 20 : Provides emolliency to skin.
BRB PMS-5 : Provides excellent powdery, smooth feel and good lubricity.
BRB DM 2 : Aids in spreadability. Provides light emolliency to skin.
BRB SG 506 : Provides excellent velvet and intense after feel. Also helps to build up.

Procedure

1) Weigh all the ingredients in phase A and mix well until homogenized.

Typical properties / Additional information

Appearance : Colored viscous liquid

Sensory attributes : Creamy, light feel

No	Ingredients (Suppliers)	INCI	Dosage (%)

The formulation is developed with the support of Azelis Turkey.

Body Shaping Mask

Body Shaping Mask is a body cream to help visibly contour, firm, and smooth the appearance of stubborn curves.

Featuring

- BRB DM 66 : Provides light and non-greasy after feel.
- BRB Caprylyl Methicone : Enhances spreadability providing silky touch.
- BRB SG 210 : Provides excellent powdery and smooth skin feel.

Procedure

- 1) Weigh phase A and heat up to 80°C.
- 2) Weigh phase B and heat up to 80°C.
- 3) Emulsify with homogenizer.
- 4) Cool down and add all rest phases from C-G.
- 5) Adjust pH if necessary. Homogenize if necessary.

Typical properties / Additional information

Deep Moisturising Shea Body Butter

Deep Moisturising Shea Body Butter is an oil-in-water emulsion which provides hydration to your skin. It helps to relief dryness, replenishes depleted moisture and enhances the performance of the skin's own moisture barrier.

Featuring

BRB DM 100 : Aids in spreadability. Provides emolliency to skin.

BRB CM 50 : Provides light and dry skin feel.

BRB SG 106 : Provides excellent velvet and intense after feel.
Also helps to build up viscosity.

Procedure

- 1) Add A2 into A1. Mix well.
- 2) Premix A3 and A4. Add the premix into step 1. Mix well.
- 3) Heat step 2 to 70-75°C.
- 4) In a separate beaker, heat phase B to 70-75°C.
- 5) Then, add step 4 into step 3. Homogenize well.
- 6) Premix C1 & C2. Add into bulk at <60°C.
- 7) At < 45°C, add D1-D4. Mix well after each addition.

Typical properties / Additional information

Appearance : Colored cream

Sensory attributes : Good spreadability, non-greasy

Gourmet Body Contour

Gourmet Body Contour is a cream formulated to contour, firm, and smooth the appearance of stubborn curves for a more toned, defined, streamlined look with a tropical mango scent.

Featuring

BRB 1740 : Provides light emolliency to skin.

BRB DM 350 : Aids in spreadability. Provides emolliency to skin.

Procedure

- 1) Prepare phase A and mix well. Heat up to 75°C.
- 2) In a separate beaker, prepare phase B and heat up to 75°C.
- 3) Add phase B to phase A at 75°C under mixing.
- 4) Add phase C and mixed well.
- 5) Cool to 35°C and add phase D, E, F under mixing.
- 6) Completely cool to room temp.

Typical properties / Additional information

Appearance : White cream

Sensory attributes : Smooth, soft feel

The formulation is developed with the support of Azelis Turkey.

Hydrating Body Butter

Hydrating Body Butter melts at body temperature and absorbs into the skin quickly, helping to condition, soften and smooth the skin while preventing dryness.

Featuring

BRB Caprylyl Methicone : Provides unique light and smooth feel.
BRB 2836 : Increases viscosity creating butter-like texture.
Provides melting sensory.

Procedure

- 1) Add A2 & A6 & A7 & A8 & A9 and A10 into a beaker and melt at 55°C.
- 2) Add other ingredients to prepare phase A.
- 3) Prepare phase B by dispersing the B3 into the water at 40-45°C.
- 4) Add phase A into phase B and homogenize with a high shear mixer for 3 minutes.
- 5) Add C1- C2 one by one into bulk. Mix well after each addition.

Typical properties / Additional information

Hydrating Body Scrub

Hydrating Body Scrub is formulated with vital skin-benefiting ingredients like almond Oil and topped with walnut shell as its exfoliant. It is highly moisturising, making skin plump and look healthy and fair.

Featuring

- BRB 2836 : Provides emolliency, rich texture, increases viscosity.
- BRB 1736 : Emollient providing silky feel.
- BRB DM 5 : Aids in spreadability. Provides light emolliency to skin.
- BRB SG 528 : Provides excellent velvety and intense after feel.

Procedure

- 1) Weigh A1 and A2. Mix well.
- 2) Premix A3 and A4. Then, add into step 1. Mix well and heat to 70-75°C.
- 3) In a separate beaker, prepare phase B and heat to 70-75°C.
- 4) Add step 3 into step 2. Homogenize well.
- 5) Add 60°C, add premix of phase C into bulk.
- 6) Premix phase D and add into bulk. Mix well.
- 7) At <40°C, add in E1 and E2. Mix well.

Typical properties / Additional information

- Appearance : White cream with suspended exfoliators
- Sensory attributes : Clean and silky after feel

Meltylicious - Body Butter Block

Meltylicious - Body Butter Block is a solid melting balm to hydrate and nourish dry, sensitive or aged skin. This solid oil penetrates tough skin and helps repair dry, chapped, ashy skin. It naturally melts with your skin leaving it elastic and moisturized. This is a water-free, more economical, self-preserved, travel-friendly, vegan formula. This product can also be plastic-free (more sustainable).

Featuring

- BRB 2836 : Provides creaminess, nourishment and hydration. Boosts balm-to-oil effect.
- BRB Caprylyl Methicone : Increases spreading and silky effect.

Procedure

- 1) Weigh all ingredients and heat up to 80°C.
- 2) When melted, place it in silicone mold and leave it to cool down.

Typical properties / Additional information

- Appearance : Yellow waxy bar
- Sensory attributes : Melting butter into oil, soothing skin

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	Naturasoft mango refined	Mangifera Indica (Mango) Seed Butter	24.80
A2	Candelilla wax	Candelilla Wax	17.00

Moisturising Cream Body Cleanser

Moisturising Cream Body Cleanser is formulated with coconut oil, a unique blend of mild surfactants and emollients to help replenish skin's moisture for softer, smoother, healthier-looking skin after a shower.

Featuring

- BRB 2835 : Provides emolliency to skin
- BRB 2836 : Provides emolliency with good compatibility with many organic ingredients. Used for melting wax

Procedure

- 1) Premix A2 & A3.
- 2) Add premix into A1 and mix well. Heat bulk to 70-75°C.
- 3) In a separate beaker, heat phase B to 70-75°C.
- 4) Add step 3 into step 2. Homogenize well.
- 5) At 60°C, add C1 into bulk and mix well.
- 6) At 45°C, add D1 into bulk and mix well.

Typical properties / Additional information

- Appearance : Light yellow cream
- Sensory attributes : Soft and smooth after rinse

Nourishing Shower Gel

Nourishing Shower Gel is a refreshing everyday body wash that cares for the skin. It nourishes deep into the skin's surface layers, giving you softer, smoother skin after just one shower.

Featuring

BRB 526 : Acts as surface tension depressant and wetting agent.

Procedure

- 1) Add phase A one by one into bulk. Mix well after each addition.
- 2) Add phase B into the bulk.
- 3) Adjust pH to 5.5-6.5 using C1.
- 4) Adjust viscosity with C2.

Typical properties / Additional information

Appearance : Clear viscous liquid
Sensory attributes : Soft and smooth feel

Oil to Milk Body Scrub

Oil to Milk Body Scrub is a rich body scrub that turns to milk in water, high in moisturising oils but does not leave oily. This formula, a body scrub and foot scrub, gently exfoliates the skin, promoting fresh, healthier, and younger-looking skin.

Featuring

- BRB PTM 20 : Provides emolliency to skin.
- BRB DM 55 : Aids in spreadability. Provides emolliency to skin.
- BRB Caprylyl Methicone : Provides unique light and smooth feel.

Procedure

- 1) Mix A1 into a beaker for 10min.
- 2) In a separate beaker, mix B1-B10 well.
- 3) Add step 2 into step 1 slowly while mixing.
- 4) After 80% of phase B is added, the mixing speed is increased.
- 5) After entire phase B is added, phase C is added and slowly mixed.

Typical properties / Additional information

Appearance : Colored gel

Pearling Creamy Body Lotion

Pearling Creamy Body Lotion is an O/W emulsion that delivers skin hydration. It is designed for dry, dull skin and instantaneously soothes the feeling of tight, dehydrated skin. A delicate shimmer will glisten and provide your skin with a radiant glow.

Featuring

BRB Caprylyl Methicone : Provides unique light and smooth feel.
BRB SG 516 : Provides excellent powdery and smooth skin feel.
Also helps to build up viscosity.

Procedure

- 1) Prepare phase A and heat to 70-75°C.
- 2) In a separate beaker, prepare phase B and heat to 70-75°C.
- 3) Add phase A into phase B at 70-75°C and mixed with high shear stirrer. Homogenized well.
- 4) Cool bulk to 45°C.
- 5) Prepare phase C1-C3 and add into bulk.
- 6) Add D1-D3 one by one into bulk. Mix well after each addition.

Typical properties / Additional information

Appearance : Light shimmering cream
Sensory attributes : Soft skin feel

Refreshing Body Gel

Refreshing Body Gel is a soothing body gel with natural anti-ageing, moisturising, and cooling actives to rapidly cool, calm, and replenish skin after sun exposure.

Featuring

BRB DM 5 : Aids in spreadability. Provides emolliency to skin.

BRB SG 506 : Provides excellent velvety and intense after feel.

Also helps to build up viscosity.

Procedure

- 1) Add A1-A5 into the main beaker and mix well under normal stirring.
- 2) Prepare Phase B in a side beaker and mix well under high shear stirring.
- 3) Add slowly phase B to phase A under rotor-stator mixing and homogenized about 3-4 min.
- 4) Add phase C and mix well.

Typical properties / Additional information

Appearance : Colored gel

Sensory attributes : Light, powdery skin feel

The formulation is developed with the support of Azelis Turkey.

Sculpture Body Spray

Sculpture Body Spray is a gel-like body lotion. It is designed to reduce the appearance of wrinkles and to sag through the flowers of Acemella. This oil-soluble actively reorganises the dermis structure for a firming and tightening effect.

Featuring

BRB 2895 : Provides light emolliency to skin.

BRB CM 50 : Aids in spreadability. Provides emolliency to skin.

Procedure

- 1) Water is heated to 75°C and add A2 slowly into water. Homogenized well for 5 min.
- 2) In a separate beaker, prepare phase B and heat to 55°C.
- 3) Add phase C into phase B at 55°C.
- 4) Add phases B+C into phase A at 50°C and mix under high speed.
- 5) Add phase D under mixing and mixed during 1 min.
- 6) Completely cool to room temp.

Typical properties / Additional information

Appearance : Fluid white emulsion

Sensory attributes : Light feel

Stretch Mark Body Cream

Stretch Mark Body Cream is specifically designed to reduce to appearance of stretch marks. It moisturises and revitalises the skin, increasing its strength and elasticity. It also prevents new stretch marks from forming.

Featuring

BRB 1860 : Provides spreadability and smooth scars and marks.

Procedure

- 1) Weigh and heat phase A at 80°C.
- 2) Weigh and heat phase B at 80°C.
- 3) Emulsification process under heat.
- 4) Add C phase once emulsion is formed.
- 5) Add D to G under 30°C or in cold conditions.
- 6) Pass through Silverson to remove lumps.

Typical properties / Additional information

Appearance : Yellow cream

Sensory attributes : Easy to spread and absorb, very smooth

Supreme Body Butter

Supreme Body Butter is an O/W emulsion which nourishes and moisturises your skin. It provides melting soft properties absorbing quickly and maintaining long-lasting hydration.

Featuring

- BRB 2836 : Increases viscosity creating a butter-like texture. It provides melting sensory.
- BRB DM 10 : Aids in spreadability and emollience to skin.
- BRB 2835 : Enhances organic sensory and improves its compatibility

Procedure

- 1) Weigh phase B and heat up in warm bath to 80°C.
- 2) Weigh phase A except preservative and mix under magnetic stirrer and heat for some minutes.
- 3) Add preservative to phase A as well as perfume to phase B before emulsifying.
- 4) Once both phases are 80°C and well dispersed, emulsify under homogenize. Leave in mixer (low speed and filmed) in order to cool down bulk and adjust pH to 5.5

Typical properties / Additional information

- Appearance : White thick cream (butter-like)
- Sensory attributes : Melty and nourishing butter, easy to absorb

Whitening Body Moisturiser

Whitening Body Moisturiser is an oil-in-water emulsion that helps lighten your skin-providing a light and non-greasy feel, creating instant bright skin.

Featuring

BRB 1417 (LC): Provides excellent dry feel.

BRB CM 56-S: Provides light and dry skin feel.

Procedure

- 1) Add phase A into bulk and mix well. Heat to 70-75°C.
- 2) In a separate tank, heat phase B to 70-75°C. Then, add phase B into A and homogenize well.
- 3) At < 60°C, add C1 & C2 into bulk and mix well.
- 4) Then, add C3 into bulk and homogenize well. Viscosity will increase gradually.
- 5) Premix phase D. At 40°C add into bulk and mix well.
- 6) Add E1 into bulk and mix well.

Typical properties / Additional information

Appearance : White cream

Sensory attributes : Light, non-greasy
