BRB Personal Care Formulation Inspiration Guide

## **An exceptional fusion of consistent product supply and competitive pricing.**

BRB Silicones, a division of BRB International B.V., specialises in producing a wide range of specialty silicones such as emulsions, antifoams, water repellents, elastomers, lubricants, silanes, resins, dimethicone & cyclomethicone blends, dimethicone polyols, cross polymers, and various customised products. Additionally, BRB Silicones offers an extensive array of core and specialty intermediates to the silicone industry, featuring a superior balance of consistent product supply and competitive pricing.

Leveraging our extensive expertise in silicones, BRB emerges as the independent producer worldwide, establishing a unique supplier position within the Personal Care industry:

- Our product range includes a wide selection of cost-effective ingredients.
- Throughout the years, we've consistently proven our ability to deliver in all circumstances.
- Compared to other silicone industry giants, we offer greater flexibility for customisation.
- Partnering with us offers the chance to address most of your concerns related to single sourcing.

### After Sun Body Repair Cream

**After Sun Body Cream** is an O/W cream to soothe the discomfort of the skin due to sun exposure, it also rehydrates, helping to prevent cutaneous dryness caused by sun exposure. It is a non-greasy and fast-absorbing formulation.

#### Featuring

- BRB 2836 : Provides emolliency with good compatibility with many organic ingredients. Used for melting wax.
- BRB 1736 : Emollient providing silky feel.
- BRB DM 100 : Aids in spreadability. Provides emolliency to skin.
- BRB Caprylyl Methicone : Provides unique light and smooth feel.
- BRB DM 55 : Provides light and dry skin feel.
- BRB SG 528 : Provides excellent velvety and intense after feel.

#### Procedure

- 1) Add A2 into A1. Mix well.
- 2) Premix A3 & A4. Add into step 1 and mix well. Heat to 70-75°C.
- 3) In a separate beaker, add B1-B7 and heat to 70-75°C.
- 4) Add step 3 into step 2. Homogenise well.
- 5) Premix C1 & C2. Add premix into bulk. Mix well.
- 6) At <40°C, add D1-D5 into bulk. Mix well after each addition.

#### Typical properties / Additional information

- Appearance : White cream.
- Sensory attributes : Rich and non-greasy.

### Barrier Body Cream with Multi-Vitamin

**Barrier Body Cream with Multi-Vitamin** is a fast absorbing, velvety feel, multi-vitamin all-over body cream which is enriched with shea butter, moisturising oil and Vitamin A, E and B3. It helps to intensely nourish, protect, and restore skin's hydrolipidic film.

#### Featuring

BRB DM 5 : Aids in spreadability. Provides light emolliency to skin.

BRB SG 516 : Provides excellent velvety and intense after feel.  
Also helps to build up viscosity.

#### Procedure

- 1) Add A1-A4 into beaker and heat to 75°C.
- 2) Prepare phase B in a separate beaker and heat to 75°C.
- 3) Add phase B into phase A and homogenise with vacuum under rotor-stator mixing for 5 minutes.
- 4) Cool down to 60°C.
- 5) Premix phase C and heat to 60°C and add into the main beaker.
- 6) Prepare phase D and add into the bulk and homogenise for 2 minutes.
- 7) Cool down to room temperature whilst slow agitation.
- 8) Add phase E and homogenise intensively again. Adjust pH between 5-5.5.

#### Typical properties / Additional information

Appearance : White opaque viscous liquid.

Sensory attributes : Light, non-greasy.

No	Ingredients (Suppliers)	INCI	Dosage (%)

### Hydrating Body Butter

**Hydrating Body Butter** melts at body temperature and absorbs into the skin quickly, helping to condition, soften and smooth the skin while preventing dryness.

#### Featuring

BRB Caprylyl Methicone : Provides unique light and smooth feel.

BRB 2836 : Increases viscosity creating butter-like texture.  
Provides melting sensory.

#### Procedure

- 1) Add A2 & A6 & A7 & A8 & A9 and A10 into a beaker and melt at 55°C.
- 2) Add other ingredients to prepare phase A.
- 3) Prepare phase B by dispersing the B3 into the water at 40-45°C.
- 4) Add phase A into phase B and homogenise with a high shear mixer for 3 minutes.
- 5) Add C1-C2 one by one into bulk. Mix well after each addition.

#### Typical properties / Additional information

Appearance : White cream.

Sensory attributes : Smooth, soft feel.

No	Ingredients (Suppliers)	INCI	Dosage (%)

### Hydrating Body Scrub

**Hydrating Body Scrub** is formulated with vital skin-benefitting ingredients like almond oil and topped with walnut shell as its exfoliant. It is highly moisturising, making skin plump and look healthy and fair.

#### Featuring

BRB 2836 : Provides emolliency, rich texture, increases viscosity.

BRB 1736 : Emollient providing silky feel.

BRB DM 5 : Aids in spreadability. Provides light emolliency to skin.

BRB SG 528 : Provides excellent velvety and intense after feel.

BRB DM 100 : Provides emolliency.

#### Procedure

- 1) Weigh A1 and A2. Mix well.
- 2) Premix A3 and A4. Then, add into step 1. Mix well and heat to 70-75°C.
- 3) In a separate beaker, prepare phase B and heat to 70-75°C.
- 4) Add step 3 into step 2. Homogenise well.
- 5) Add 60°C, add premix of phase C into bulk.
- 6) Premix phase D and add into bulk. Mix well.
- 7) At <40°C, add in E1 and E2. Mix well.

#### Typical properties / Additional information

Appearance : White cream with suspended exfoliators.

Sensory attributes : Clean and silky after feel.

### Meltylicious - Body Butter Block

**Meltylicious - Body Butter Block** is a solid melting balm to hydrate and nourish dry, sensitive or aged skin. This solid oil penetrates tough skin and helps repair dry, chapped, ashy skin. It naturally melts with your skin leaving it elastic and moisturised. This is a water-free, more economical, self-preserved, travel-friendly, vegan formula. This product can also be plastic-free (more sustainable).

#### Featuring

BRB 2836 : Provides creaminess, nourishment and hydration.  
Boosts balm-to-oil effect.  
BRB Caprylyl Methicone : Increases spreading and silky effect.

#### Procedure

- 1) Weigh all ingredients and heat up to 80°C.
- 2) When melted, place it in silicone mould and leave it to cool down.

#### Typical properties / Additional information

Appearance : Yellow waxy bar.  
Sensory attributes : Melting butter into oil, soothing skin.

No	Ingredients (Suppliers)	INCI	Dosage (%)
A1	Naturasoft Mango Refined	Mangifera Indica (Mango) Seed Butter	24.80
A2	Candelilla Wax	Candelilla Wax	17.00

### Moisturising Cream Body Cleanser

**Moisturising Cream Body Cleanser** is formulated with coconut oil, a unique blend of mild surfactants and emollients to help replenish skin's moisture for softer, smoother, healthier-looking skin after a shower.

#### Featuring

BRB 2835 : Provides emolliency to skin.

BRB 2836 : Provides emolliency with good compatibility with many organic ingredients. Used for melting wax.

#### Procedure

- 1) Premix A2 & A3.
- 2) Add premix into A1 and mix well. Heat bulk to 70-75°C.
- 3) In a separate beaker, heat phase B to 70-75°C.
- 4) Add step 3 into step 2. Homogenise well.
- 5) At 60°C, add C1 into bulk and mix well.
- 6) At 45°C, add D1 into bulk and mix well.

#### Typical properties / Additional information

Appearance : Light yellow cream.

Sensory attributes : Soft and smooth after rinse.

### Acne Care Gel Cream Moisturiser

**Acne Care Gel Cream Moisturiser** is designed for oily, and acne-prone skin.

It improves the skin's overall appearance, reduces acne and blemishes, and evens out the skin texture, making skin soft and smooth. It is a lightweight and fast-absorbing formulation.

#### Featuring

BRB 526 : Wetting agent and stabilising the emulsion.

BRB DM 5 : Aids in spreadability. Provides light emollience to skin.

BRB PMS-2 : Aids in sebum absorption and provides a matte effect with silky touch.

BRB SG 528 : Provides excellent velvet and intense after-feel.

#### Procedure

- 1) Weigh phase A and mix well.
- 2) Premix phase B. Then add into bulk and mix well.
- 3) In a separate beaker, prepare phase C.
- 4) Add step 3 into step 2.
- 5) Add D and homogenise well.
- 6) Add in E1 and E2. Mix well after each addition.

#### Typical properties / Additional information

Appearance : Light yellow cream.

Sensory attributes : Light and non-greasy feel.

### AHA Renewing Cream

**AHA Renewing Cream** is an O/W AHA exfoliant cream formulation that visibly smooths rough, bumpy, crepey skin while moisturizing with avocado oil and renewing the skin barrier with Japonica Bud Extract. It provides a consistent, gentle exfoliation to help improve visible signs of ageing, including dullness and discoloration.

#### Featuring

BRB DM 350 : Aids in spreadability and emolliency.

BRB Caprylyl Methicone : Helps spreadability and lubricity.

BRB 2895 : Provides light emolliency to skin.

#### Procedure

- 1) Dissolve EDTA into water and pre-disperse A3, A4 and A5. Add all ingredients into the water and mix well by using a high-speed mixer. Heat up to 75°C.
- 2) In a separate beaker, prepare phase B and heat up to 75°C.
- 3) Add phase B into phase A under high mixing speed for 10 min at 75°C.
- 4) Cool the mixture under normal speed mixing to 50°C.
- 5) Prepare phase C and add to the main beaker at 50°C.
- 6) Add phase D one by one into bulk below 40°C. Mix well.
- 7) Cool to room temperature while mixing. Adjust pH if needed.

#### Typical properties / Additional information

Appearance : Soft white emulsion.

Sensory attributes : Easy to absorb, light feel.

### Deep Cleansing Facial Oil

**Deep Cleansing Facial Oil** is an anhydrous and alcohol-free formulation which completely dissolves face makeup, oil and impurities. Massage it onto your dry face and immediately remove makeup. Add water and it transforms to milky emulsion. Rinse off cleanly with water, leaving skin feeling soft, supple and non-greasy.

#### Featuring

BRB Caprylyl Methicone : Use as dispersing medium for colour pigments.  
Provides unique light and smooth feel.

#### Procedure

1) Add phase A one by one into bulk. Mix well after each addition.

#### Typical properties / Additional information

Appearance : Yellowish opaque stick.

Sensory attributes : Silky and smooth feel.

## Detoxifying & Anti-Pollution Face Massage Lotion

**Detoxifying & Anti-Pollution Face Massage Lotion** is a water-in-oil emulsion which protects skin against environmental stresses.

### Featuring

- BRB 423 : Acts as water-in-silicone emulsifier.  
BRB 6341 : Acts as co-emulsifier.  
BRB Caprylyl Methicone : Used as dispersing medium for colour pigments. Provides unique light and smooth feel.  
BRB DM 5 : Aids in spreadability. Provides emolliency to skin.  
BRB PTM 20 : Provides emolliency and shininess to skin.

### Procedure

- 1) Add phase A into a beaker. Mix well.
- 2) In a separate beaker, mix phase B.
- 3) Add step 2 into step 1 slowly.
- 4) Then, add in C1-C3.

### Typical properties / Additional information

- Appearance : White cream.  
Sensory attributes : Good spreadability.

### Face & Neck Sunscreen Cream

**Face & Neck Sunscreen Cream** is an oil-in-water emulsion which provides sun protection with broad spectrum sunscreen to help prevent premature signs of skin ageing caused by the sun.

#### Featuring

BRB DM 55 : Provides light and dry skin feel.

BRB 2835 : Good compatibility with many organic cosmetic ingredients. Enhanced SPF for organic & inorganic sunscreens.

BRB TMS-50I : Acts as film former. Gives wash-off resistance effect.

BRB PMS-5 : Provides soft focus and anti-wrinkle effect.

#### Procedure

- 1) Prepare phase A and heat to 83°C.
- 2) Add B2 into water and dissolve.
- 3) Disperse B5 in B3 and add into phase B.
- 4) Add B4 & B6 into phase B and heat to 85°C.
- 5) Add phase B into phase A at 83°C and mix with the high shear stirrer. Homogenise well.
- 6) Cool bulk to 45°C.
- 7) Prepare phase C and add in bulk.
- 8) Add D1 into bulk. Mix well after each addition.

#### Typical properties / Additional information

Appearance : White lotion.

Sensory attributes : Soft & silky feel.

### Face Bubbling Mask with Charcoal

**Face Bubbling Mask with Charcoal** is specially formulated to clean your face by eliminating impurities and traces of pollution. Its gel texture transforms into micro-bubbles upon contact with air. Massage excess bubble with fingertips and then rinse off. It helps to eliminate impurities and traces of pollution leaving skin clean and soft.

#### Featuring

BRB 526 : Acts as surface tension depressant and wetting agent.

BRB DM 0.65 : Provides bubbling effect.

#### Procedure

- 1) Add A1 & A2 into a beaker and mix well.
- 2) Then add in A3. Mix well.
- 3) Adjust pH to 6-7 with A4.
- 4) Add B1-B3 one by one into bulk. Mix well after each addition.
- 5) Premix phase C. Add premix into bulk.
- 6) Add D1 into bulk. Mix well. Then, fill the product into airless bottle.

#### Typical properties / Additional information

Appearance : Black viscous liquid.

Sensory attributes : Clean and soft after wash.

No	Ingredients (Suppliers)	INCI	Dosage (%)

### Hydra Hemp Day Cream

**Hydra Hemp Day Cream** is a face moisturiser that reduces the look of lines and wrinkles and gives your skin a youthful glow. It balances and provides long-term hydration and a healthy look.

#### Featuring

BRB 1860 : Provides emolliency and smooth feeling.

BRB DM 55 : Provides spreadability and light sensory.

BRB PMS-5 : Reduces wrinkles and fine lines.

#### Procedure

- 1) Weigh and heat phase A at 80°C.
- 2) Weigh and heat phase B at 80°C.
- 3) Emulsification process under heat.
- 4) Add Sharomix under 30°C and let it cool down.
- 5) Add F and D in cold conditions.

#### Typical properties / Additional information

Appearance : Green fluid cream.

Sensory attributes : Moisturizing, soft focus.

### Makeup Remover Solid Oil

**Makeup Remover Solid Oil** is a balm-to-oil cleanser that melts away makeup and impurities to reveal clear and clean skin. Argan oil and coconut oil provide intense nourishment as it cleanses, leaving your skin feeling soft and supple. Massage in circular motion to remove the makeup. Then add water to emulsify and further cleanse the skin. Rinse off.

#### Featuring

- BRB PTM 20 : Provides emolliency and shininess to skin.
- BRB Caprylyl Methicone : Used as dispersing medium for colour pigments. Helps to remove makeup and provides unique light and smooth feel.
- BRB 2836 : Provides emolliency with good compatibility with many organic ingredients. Used for melting wax and balm-to-oil formulation.
- BRB 2835 : Provides emolliency to skin.
- BRB DM 55 : Aids in spreadability. Provides light emolliency to skin.

#### Procedure

- 1) Add A1-A8 into a beaker and heat to 80-85°C. Make sure all ingredients are fully melted.
- 2) Add A9-A11 into step 1. Mix well.
- 3) Pour into container while hot.

#### Typical properties / Additional information

- Appearance : White balm.
- Sensory attributes : Soft & silky.

### Revitalizing Detox Cream

**Revitalizing Detox Cream** is a water-in-oil emulsion which detoxifies skin and protects it from environmental stress. It lubricates with natural lipids, detoxifies with plant extracts and protects from external aggressions by creating a non-occlusive breathable barrier.

#### Featuring

- BRB 423 : Water-in-oil emulsifier.  
BRB DM 2 : Provides light emolliency.  
BRB Caprylyl Methicone : Helps spreadability and lubricity.  
BRB PMS-5 : Provides soft focus anti-wrinkle effect.  
BRB SG 516 : Gives velvety and powdery feel.

#### Procedure

- 1) Weigh SG 516 with 423 and mix with a magnetic stirrer, then add the rest of the silicone phase.
- 2) Add the rest of phase A and heat up to 60°C.
- 3) Weigh phase B until homogenisation and heat up to 60°C.
- 4) Place phase A into mixer and begin pouring phase B little by little, forming emulsion.
- 5) Once emulsion is formed, add phases C and D.
- 6) Pass it through Silverson (3000 rpm) for 3 minutes or turrax.

#### Typical properties / Additional information

- Appearance : White creamy lotion.  
Sensory attributes : Easy to spread, silky rich touch.

No	Ingredients (Suppliers)	INCI	Dosage (%)

### Sensitive Cooling After-shave Balm

**Sensitive Cooling After-Shave Balm** is a soothing, moisturising balm with added cooling ingredients. This soothes the skin and leaves skin feeling fresh.

#### Featuring

- BRB DM 55 : Provides light and dry skin feel.  
BRB SG 506 : Provides excellent powdery and smooth skin feel.  
Also helps to build up viscosity.  
BRB Caprylyl Methicone : Provides unique light and smooth feel.  
BRB PMS-5 : Provides soft focus anti-wrinkle effect.

#### Procedure

- 1) Add A2 into water and dissolve.
- 2) Add A3, A4, A5 and A6 into the bulk.
- 3) Prepare for both phase B and add into the phase A. Homogenise well.
- 4) Prepare phase C and add in bulk.
- 5) Add D1-D2 one by one into bulk. Mix well after each addition.

### Skin Calming Hydration Cream

**Skin Calming Hydration Cream** provides long-term moisture for dry, itchy skin. It contains centella asiatica extract which helps to soothe and clarify skin while reducing blemishes, leaving skin refreshed and resilient.

#### Featuring

BRB 423	: Acts as water-in-oil emulsifier.
BRB DM 55	: Aids in spreadability. Provides light emolliency to skin.
BRB 2836	: Provides emolliency with good compatibility with many organic ingredients. Used for melting wax.
BRB SG 528	: Provides excellent velvety and intense after feel.
BRB Caprylyl Methicone	: Improves spreadability and silkiness.
BRB 6340	: Acts as water-in-silicone emulsifier.

#### Procedure

- 1) Add phase A into a beaker and mix well.
- 2) In a separate beaker, mix phase B well.
- 3) Add phase A slowly into phase B. Homogenise well.
- 4) Add C1-C5 one by one into bulk. Mix well.

#### Typical properties / Additional information

Appearance	: White cream.
Sensory attributes	: Easy to spread, non-greasy feel.

### Skin Melting Cream

**Skin Melting Cream** is a water-in-oil emulsion that melts and wraps the skin in ultimate moisture. This luxuriously rich cream forms a protective veil to retain moisture from the skincare you used before the cream. It covers the skin in total moisture, resulting in a smoother, hydrated, soft skin feel.

#### Featuring

- BRB 2836 : Provides emolliency to skin.
- BRB 423 : Acts as water-in-oil emulsifier.
- BRB Caprylyl Methicone : Provides unique light and smooth skin feel.
- BRB DM 5 : Aids in spreadability. Provides emolliency to skin.
- BRB SG 250 : Provides excellent powdery and smooth skin feel.

#### Procedure

- 1) Heat phase A1-A7 to 80-85°C.
- 2) Premix phase B.
- 3) Add step 2 into step 1.
- 4) In a separate beaker, heat C1-C4 to 80-85°C.
- 5) Add step 4 into step 3 slowly. Homogenise well.
- 6) Cool bulk to 45°C. Add D1 into bulk. Mix well.

#### Typical properties / Additional information

- Appearance : White cream.
- Sensory attributes : Rich and silky feel.

### Sunblock Cream Vitamin C SPF 50

**Sunblock Cream Vitamin C SPF 50** is an oil-in-water formulation that provides a high level of protection against digital blue light damage and UVA/UVB pollution. The formulation also includes Vitamin C and Withania Somnifera Root Extract that visibly brightens skin and targets dark spots caused by UV and blue light.

#### Featuring

BRB DM 55 : Aids in spreadability. Provides light emolliency to skin.

BRB SG 516 : Provides excellent velvet and intense after feel.  
Also helps to build up viscosity.

BRB TMS-30D : Acts as film former. Provides long lasting and wash off resistance effect.

#### Procedure

- 1) Add A1-A4 into beaker and heat to 75°C.
- 2) Prepare phase B in a separate beaker and heat to 75°C
- 3) Add phase B into phase A and homogenise under rotor-stator mixing for 5 minutes.
- 4) Cool down under mixing.
- 5) Premix phase C and add into the main beaker at 60°C.
- 6) Prepare phase D and add into the bulk at 45°C. Homogenise well.
- 7) Cool down to room temperature whilst slow agitation.
- 8) Add phase E at 40°C and homogenise intensively again.
- 9) Cool down to room temperature whilst slow agitation.

#### Typical properties / Additional information

Appearance : Yellowish white viscous liquid.

Sensory attributes : Creamy, light feel.

### 3-in-1 Magic Hair Cream

#### 3-in-1 Magic Hair Cream (Anti-Breakage & Split-End Repair & Shine Booster)

is an O/W emulsion which makes hair smooth, and shine. It provides split-end protection and anti-breakage effect.

#### Featuring

BRB SF 242 : Provides superior conditioning and shining effect.

BRB DM 55 : Provides light and non-greasy after feel.

BRB TMS-30D : Film forming properties. Helps to control hair fizziness.

#### Procedure

- 1) Add A2 and A3 into water and dissolve well. Heat to 70°C.
- 2) Add A4 into step 1, mix well and dissolve well.
- 3) Add B1-B6, mix well.
- 4) Prepare phase B into phase A.
- 5) Prepare phase C and add into the bulk.

#### Typical properties / Additional information

Appearance : Beige cream.

### 3-in-1 Magic Hair Serum

**3-in-1 Magic Hair Serum (Anti-Breakage & Split-End Repair & Shine Booster)**  
is a silicone-based hair serum without D5.

#### Featuring

- BRB SF 242 : Provides superior conditioning and shining effect.
- BRB DM 55 : Provides light and non-greasy after feel.
- BRB TMS-30D : Film forming properties. Helps to control hair fizziness.
- BRB 1736 : Provides silkiness and smoothness to hair.

#### Procedure

- 1) Add phase A one by one into bulk. Mix well after each addition.

#### Typical properties / Additional information

- Appearance : Clear to slightly hazy yellow liquid.
- Sensory attributes : Silky & non-greasy.

### Anti-aging Hair Lotion (leave-in)

**Anti-aging Hair Lotion** is a sprayable hair lotion which nourishes weightlessly, provides moisturising and increased strengthening properties. It imparts excellent wet/dry combability, sheen and detangling properties.

#### Featuring

BRB DM 55 : Provides light and non greasy after feel.

BRB PTM 2 : Provides shininess to hair.

BRB 5446 : Provides superior wet and dry combing effect and conditioning effect. Enhanced colour and heat protection.

#### Procedure

- 1) Add A2 into water and dissolve.
- 2) Add A3, A4 and A5 into the bulk.
- 3) Prepare phase B and add into the phase A. Homogenise well.
- 4) Prepare phase C and add in bulk.
- 5) Add D1-D2 one by one into bulk. Mix well after each addition.

#### Typical properties / Additional information

Appearance : Beige lotion.

Sensory attributes : Soft and silky feel.

### Apple Cider Vinegar Conditioner

**Apple Cider Vinegar Conditioner** is an O/W emulsion which conditions and restores moisture while helping to remove dulling residue.

#### Featuring

- BRB PTM 20 : Provides shining effect and acts as an emollient.  
BRB 1298 : Provides superior wet and dry combing and conditioning effect. Improves hair volume and shine.  
BRB 5446 : Provides superior conditioning as well as heat and colour protection.

#### Procedure

- 1) Dissolve EDTA into water and add A3. Neutralise with A4 and heat to 80°C.
- 2) Add A5 and A6 into the beaker and neutralise with A7. Dissolve well.
- 3) In a separate beaker, prepare phase B and heat to 80°C.
- 4) Add phase B into phase A at 80°C.
- 5) Cool the mixture under normal speed mixing to 60°C.
- 6) Prepare phase C and add to main beaker at 60°C.
- 7) Add phase D one by one into bulk below 40°C. Mix well.

#### Typical properties / Additional information

Appearance : White cream emulsion.

## Colour & Styling Hair Cream

**Colour & Styling Hair Cream** is a styling cream that effortlessly moulds hair into the style you want. This versatile cream works on straight, curly, thick or thin hair. This formulation adds texture, shine, and temporary grey shade to the hair.

### Featuring

BRB 1860 : Provides high conditioning on hair. Repairs and protects from external damage.

### Procedure

- 1) A1 & A2 add into A4, A5 & A9 and disperse well.
- 2) Add the rest of the ingredient in phase A into a beaker and heat to 70-75°C.
- 3) In a separate beaker, prepare phase B and heat to 70-75°C.
- 4) Add phase A into phase B at 70-75°C and mix in high shear stirrer. Homogenise well.
- 5) Cool bulk to 45°C.
- 6) Prepare phase C and add into bulk.
- 7) Add D1-D4 one by one into bulk. Mix well after each addition.

### Typical properties / Additional information

Appearance : Grey cream.

### Gummy Hair Gel

**Gummy Hair Gel** is specially formulated to create a soft sleek, and shiny appearance. It provides a well-defined hair structure and provides light hold and a trace of shine.

#### Featuring

BRB 526 : Provides smoothing and elasticity for gel film structure.  
Enhanced shine effect.

#### Procedure

- 1) Add A2 in water and mixed in high speed. Disperse well.
- 2) Prepare phase B and mix with phase A. Neutralise with C1.
- 3) Add D1 into bulk and neutralise with D2. Mix well.
- 4) Add D3-D4 one by one into bulk. Mix well.
- 5) In a separate beaker, prepare Phase F.
- 6) Add phase E and phase F into bulk and mix well.
- 7) Add G1-G2 one by one into bulk. Mix well after each addition.

#### Typical properties / Additional information

Appearance : Coloured gel.

No	Ingredients	INCI	Dosage (%)

### Hair Balm (for condition & care & style)

**Hair Balm (for condition & care & style)** is designed for dried-out hair, enriching with lavender extract, jojoba esters and an active texturising agent that recreates the hair's protective lipid layer. Creamy balm texture that melts into hair immediately penetrates lengths and provides perfect coating down to ends.

#### Featuring

BRB DM 55 : Provides light and non-greasy after feel.

BRB 9719 : Provides good wet and dry combing, leaves hair silky and soft.

#### Procedure

- 1) Prepare phase A one by one into bulk. Mix well after each addition.
- 2) Add phase B and adjust pH between 6-7 and heat to 75°C.
- 3) Prepare phase C in a side beaker and heat to 75°C.
- 4) Add phase C into phase A+B under a rotor-stator mix until homogenised for approx 10 minutes..
- 5) Cool down to 40°C under slow mixing.
- 6) Add phase D and mix slowly under normal stirring.
- 7) Cool down to room temperature.

#### Typical properties / Additional information

Appearance : Creamy viscous liquid.

Attributes : Smooth and silky.

### Hair Shine Pomade

**Hair Shine Pomade** moisturises the hair and scalp, smoothenes edges and controls frizz. It also delivers a long-lasting and polished look while providing a good grip for slick backs, pompadours, side parts or any hairstyle.

#### Featuring

BRB SF 242 : Provides superior conditioning as well as heat and colour protection.

BRB PTM 20 : Provides shining effect and acts as an emollient.

#### Procedure

- 1) Prepare phase A one by one into bulk and heat to 85°C.
- 2) Prepare phase B one by one into bulk and heat to 85°C.
- 3) Add phase A into phase B.
- 4) Add phase C at 60°C.
- 5) Pour into mould while hot.

#### Typical properties / Additional information

Appearance : Coloured pomade.

Sensory attributes : Smooth and silky.

### Hair Tip Stick

**Hair Tip Stick** is a slick balm that provides shining effect to hair without residue on the hair surface. It has lightweight, buildable texture and eliminates unruly flyaways and frizz while adding instant shine.

#### Featuring

BRB Caprylyl Methicone : Aids in spreadability. Provides emolliency to skin.

BRB TMS-50I : Reduces flyaway and controls frizz.

#### Procedure

- 1) Add A1-A3 into a beaker and heat to 110-120°C.  
Make sure all ingredients are fully melted.
- 2) In a separate beaker, add B1-B6. Mix well.
- 3) Add step 2 into step 1 at 70-80°C while stirring.
- 4) Pour into container while hot.

#### Typical properties / Additional information

Appearance : Clear stick.

Sensory attributes : Light and non-greasy.

### Hair Treatment Wax

**Hair Treatment Wax** is an intensive rinse-off conditioner for dry-weak hair. It leaves hair deeply nourished, revitalised and silky smooth.

#### Featuring

BRB 1288 : Repairs damaged fibers, provides excellent conditioning effect to hair.

BRB DM 350 : Aids in spreadability. Provides conditioning and smoothing effect.

#### Procedure

- 1) Add A1-A5 into a beaker and heat to 80-85°C.
- 2) In a separate beaker, prepare phase B and heat to 80-85°.
- 3) Add step 1 into step 2. Homogenise well.
- 4) Cool bulk to 45°C and add phase C, mix well.
- 5) Add phase D and mix well.

#### Typical properties / Additional information

Appearance : White thick cream.

Sensory attributes : Smooth and silky.

### Pre-Shampoo Mask

**Pre Shampoo Mask** coats the hair in a nourishing layer and helps keep hair hydrated, flexible, and silky-smooth. This formulation is different from a conditioner. If there are dry ends and oily roots, a pre-shampooing treatment works to add moisture back into the hair before washing it.

#### Featuring

- BRB 5446 : Provides superior wet and dry combing and conditioning effect.  
Enhanced colour and heat protection.
- BRB 526 : Provides smoothing and elasticity for gel film structure.  
Enhanced shine effect.
- BRB 5834 : Adds volume and shine.

#### Procedure

- 1) Add A2 into water.
- 2) Add A3- A6 into the bulk and heat to 80°C and dissolve well.
- 3) Prepare phase B and add into the bulk at 40°C
- 4) Prepare phase C and add into the bulk at 40°C and mix well.
- 5) Adjust viscosity with phase D. (pH: 4.0-4.5).

#### Typical properties / Additional information

- Appearance : Coloured cream.
- Sensory attributes : Soft & smooth.

### RinginG Gel Hair Pomade

**RinginG Gel Hair Pomade** is a translucent balm that helps to style your hair. It provides your hair with a long-lasting shine without stickiness and residue, with the ability to reshape and comb throughout the day. It is easy to wash out as it is a water-based formulation.

#### Featuring

BRB 526 : Act as surface tension depressant and wetting agent.  
BRB DM 55 : Provides light and dry skin feel.  
BRB PTM 20 : Provides shine effect on hair.

#### Procedure

- 1) Weigh A1-A5 into a beaker and heat to 70-75°C. Mix well.
- 2) In a separate beaker, add B1-B4 and heat to 70-75°C.
- 3) Add step 2 into step 1. Mix well.
- 4) Then, add C1 into bulk.
- 5) Pour into mould while hot.

#### Typical properties / Additional information

Appearance : Light yellow balm.

### Root Cover Up

**Root Cover Up** is a concealing powder that blends naturally with existing colours. This formula is the quickest solution to cover grey hair. It contains reflective pigments that adhere to hair without drying. Hair retains its natural shine and feel. It covers grey roots instantly without any oily or sticky residue.

#### Featuring

BRB PMS-5 : Provides oil absorption and helps water resistance.

BRB TMS-30D : Acts as a film former. Provides colour fixing for zero transfer and long lasting colour.

BRB DM 100 : Acts as a binder.

#### Procedure

- 1) Add phase A into the beaker and mix well.
- 2) Add phase B into the beaker slowly and mix well.
- 3) Sieve the powder mix.
- 4) Pressed via a powder-press machine.

#### Typical properties / Additional information

Appearance : Brown powder.

### Smooth Care Hair Oil Balm

**Smooth Care Hair Oil Balm** is an anhydrous formulation that helps to repair dry and damaged hair. It transforms from balm to oil and penetrates frizzy, dry, unmanageable hair for lasting smoothness and shine. Start with the ends of your hair and work towards the middle section of your hair. Do not apply on the scalp.

#### Featuring

- BRB 1861 : Provides hair conditioning and improved hair shine.
- BRB DM 55 : Provides light and dry skin feel.
- BRB PTM 20 : Provides shininess effect on hair.
- BRB 2836 : Provides emolliency with good compatibility with organic ingredients. Used for melting wax.

#### Procedure

- 1) Weigh A1-A6 into a beaker and heat to 80°C. Mix well.
- 2) Add B1 & B2 into step 1. Mix well.
- 3) Pour into mould while hot.

#### Typical properties / Additional information

- Appearance : Light yellow balm.
- Sensory attributes : Light and non-greasy.

No	Ingredients	INCI	Dosage (%)

### Strengthening & Hydrating Hair Oil-in-Cream (leave-in)

**Strengthening and Hydrating Hair Oil-in-Cream** is a unique oil within a cream that nourishes and strengthens dry hair. It leaves your hair softer and shinier without stickiness. It is a multi-use product for pre-wash, post-wash and as an overnight mask. It nourishes and makes the hair feel stronger.

#### Featuring

BRB 5834 : Provides conditioning and shininess to hair.

BRB 1288 : Provides superior conditioning as well as heat and colour protection.

#### Procedure

- 1) Heat and mix A1-A3 to 83-85°C.
- 2) In a separate beaker, heat B1-B12 to 83-85°C.
- 3) Add step 2 into step 1. Homogenise well.
- 4) Cool bulk to 40°C.
- 5) Add C1-C5 into bulk one by one. Mix well after each addition.
- 6) Add D phase.

#### Typical properties / Additional information

Appearance : White cream.

### Styling Pomade

**Styling Pomade** is specially formulated to create slick styles like pompadours, side parts and greaser styles. It smoothens the hair by going deep within the surface of the hair shaft to lock in moisture, providing lustre and shine while taming the fizziness of hair.

#### Featuring

BRB 423 : As W/O emulsifier.

BRB 5834 : Provides conditioning and shine to hair.

#### Procedure

- 1) Heat phase A to 80-85°C.
- 2) In a separate beaker, heat phase B to 80-85°C.
- 3) Add step 2 slowly into step 1. Homogenise well.

#### Typical properties / Additional information

Appearance : White cream.

Sensory attributes : Shine and smooth feel.

No	Ingredients	INCI	Dosage (%)
<b>A1</b>	<b>BRB 423</b>	<b>Cetyl PEG/PPG-10/1 Dimethicone</b>	<b>2.50</b>

### Triple Phase Hair Mist

**Triple Phase Hair Mist** helps to strengthen, repair and hydrate hair, leaving it looking glowing, healthy without weighing it down. Gently shake this three-phase hair mist containing golden jojoba oil onto hair to help add luster, shine and softness to hair. It also protects hair against thermal damage and prevents from colour fading.

#### Featuring

BRB 5446 : Provides superior conditioning as well as heat and colour protection.

BRB DM 20 : Improves spreadability.

BRB DM 5 : Provides light and non-greasy after feel.

#### Procedure

- 1) Add phase A one by one into bulk. Mix well after each addition.
- 2) In a separate beaker, prepare B and mix well. Then, add into step 1.
- 3) In a separate beaker, prepare C and mix well. Then, add into step 1.

#### Typical properties / Additional information

Appearance : Three layered liquid.

### Audacious Lipstick

**Audacious Lipstick** is an easy to apply formulation and this is revealed instantly. It is a rich pigmented lipstick that last long after application. It has long-lasting wear, and a luxurious texture that smooths and nourishes.

#### Featuring

- BRB 2836 : Provides emolliency to skin.  
BRB TMS-501 : Acts as a film former. Provide colour fixing for no transfer and long lasting.  
BRB PMS-5 : Fills into fine lines to provide smooth surface.  
BRB Caprylyl Methicone : Provides excellent powdery and smooth skin feel.

#### Procedure

- 1) Mix A1-A10 into a beaker and heat it up to 85-95°C.
- 2) Pour into mould at about 80°C.
- 3) Cool mould in freezer.
- 4) Assemble stick into packaging.

#### Typical properties / Additional information

- Appearance : Red stick.  
Sensory attributes : Semi-matte, creamy and long-lasting.

### Colour é m up- Cheek & Lip Tint

**Colour é m up- Cheek & Lip Tint** is a unique balm formula which hydrates and protects while creating a beautiful, natural finish on both cheek and lip. This balm is long-wearing and water resistant yet non-sticky for a fresh-faced and glowing skin. Enriched with jojoba oil and sunflower oil.

#### Featuring

- BRB 2836 : Provides emollience with good compatibility with many organic ingredients. Used for melting wax and cream-to-oil formulation.
- BRB Caprylyl Methicone : Provides unique light and smooth feel.
- BRB Color Lock : Acts as film former. Gives wash off resistance effect.
- BRB PTM 20 : Provides shininess to skin.

#### Procedure

- 1) Add A1-A5 into a beaker and heat to 110-120°C. Make sure all ingredients are fully melted.
- 2) In a separate beaker, add B1-B8. Mix well.
- 3) Add step 2 into step 1 at 70-75°C while stirring.
- 4) Pour into container while hot.
- 5) Cool to room temperature while mixing.

#### Typical properties / Additional information

Appearance : Red balm.

### Kissproof Matte Lipcolour

**Kissproof Matte Lipcolour** is easy to spread, dries quickly, provides matte colour coverage and stays on your lips all day.

#### Featuring

- BRB DM 60000 : Film former base.
- BRB DM 0.65 : Aids in spreadability, sticky feel removing.
- BRB Caprylyl Methicone : Helps to spread pigments homogeneously to ensure right coverage.
- BRB TMS-501 : Provides colour fixing for no transfer and long lasting.
- BRB PMS-2 : Matte effect with silky touch.
- BRB PMS-5 : Fill the small wrinkles and provide a smooth lip surface.

#### Procedure

- 1) Disperse B phase with A phase and heat up to 80°C.
- 2) Pass A+B phases through a three-roll-mill twice.
- 3) Cool down and add C phase below 30°C.
- 4) Add phase D and E mix and fill the pack.

#### Typical properties / Additional information

- Appearance : Intense pink consistent liquid.
- Sensory attributes : Extra coverage, mattifying and no colour transfer.

### Liquid Light Luminiser

**Liquid Light Luminiser** is a silky, lightweight, and long-wearing liquid highlighter that creates a lasting, soft, and luminous finish.

#### Featuring

- BRB 6341 : Acts as water-in-silicone emulsifier.
- BRB 423 : Acts as water-in-oil emulsifier.
- BRB PTM 20 : Provides emolliency and shininess to skin.
- BRB DM 55 : Aids in spreadability. Provides light emolliency to skin.
- BRB DM 2 : Aids in spreadability. Provides light emolliency to skin.
- BRB Colour Lock : Acts as a film former. Provides colour transfer resistance and long-lasting effect.

#### Procedure

- 1) Weigh Kelcogel CG-LA and water in a side beaker for phase A, heat to 70°C and mix well.
- 2) Cool phase A to 30°C and weigh the remaining ingredients. Mix well.
- 3) Weigh phase B in a main beaker and mix well.
- 4) Add phase A to phase B slowly under high shear mixing until homogenised.
- 5) Add phase C under normal mixing.

#### Typical properties / Additional information

Appearance : Coloured viscous liquid.

Sensory attributes : Light and non-greasy.

### Liquid Suede Cream Lipstick

**Liquid Suede Cream Lipstick** is a weightless mousse lip cream in highly pigmented colours that gives lips a comfortable, long-lasting, soft velvety matte finish.

#### Featuring

BRB DM 55 : Aids in spreadability. Provides light emolliency to skin.

BRB DM 100 : Aids in spreadability. Provides emolliency to skin.

BRB TMS : Acts as a film former.

BRB 2836 : Provides emolliency to skin.

BRB PMS-5 : Provides excellent powdery, smooth feel and good lubricity.

BRB SG 517 : Provides excellent velvet and intense after feel. Also helps to build up viscosity.

#### Procedure

- 1) Prepare phase A and mix well.
- 2) Add phase B into phase A and heat to 80°C and mix well.
- 3) Add phase C and mix until the powders are completely dispersed.
- 4) Add phase D and homogenise well.

#### Typical properties / Additional information

Appearance : Coloured viscous liquid.

## Mousse Colour Cheeks and Eyes and Lips

**Mousse Colour Cheeks and Eyes and Lips** applies to your cheeks, lips and eyes for a monochromatic look and build to your desired intensity. This formula dries rapidly and should be blended quickly when applied on cheeks.

### Featuring

BRB DM 55 : Aids in spreadability. Provides light emolliency to skin

BRB PTM 20 : Provides emolliency and shininess to skin

BRB Color Lock : Acts as a film former. Provides color transfer resistance and long-lasting effect.

### Procedure

- 1) Add A5 into water and mix.
- 2) Premix A3 and A4 with glycerine and add into step 1 under high-speed mixing. Heat to 70-75°C.
- 3) Prepare phase B in a side beaker and heat to 70-75°C.
- 4) Add phase B to phase A under mixing.
- 5) Prepare phase C and add into the bulk and mix well.
- 6) Add phase D below 40°C and mix well.
- 7) Add phase E and mix well.
- 8) Adjust pH between 6.0-7.0.
- 9) Fill in containers.

### Typical properties / Additional information

Appearance : Creamy coloured mousse.

Sensory attributes : Smooth and light feel.

### Soft Pinch Blush

**Soft Pinch Blush** is a refreshing, light weight feel with a soft-focus finish blusher. This blush has long wear performance with a silk-like texture.

#### Featuring

- BRB DM 20 : Improves spreadability.
- BRB SG 528 : Provides excellent velvet and intense after feel.  
Also helps to build up viscosity
- BRB Colour Lock : Acts as a film former.
- BRB Caprylyl Methicone : Acts as dispersing medium for colour pigments.  
Provides unique light and smooth feel.
- BRB 2836 : Provides emolliency with good compatibility with many organic ingredients.
- BRB PMS-5 : Provides excellent powdery, smooth feel and good lubricity.

#### Procedure

- 1) Prepare phase A and homogenise well. And heat to 70-75°C.
- 2) In a separate beaker, heat phase B to 70-75°C. And add into step 1.
- 3) In a separate beaker, prepare phase C. Add into bulk and mix well.

#### Typical properties / Additional information

### Tinted Cream Blush

**Tinted Cream Blush** has creamy, velvety texture that glides on buildable colour, creates a soft glow skin finish. It is a soft dewy tint for lips and cheeks with enhanced blendability and smoothness.

#### Featuring

- BRB PTM 20 : Provides emolliency and shininess to skin.  
BRB SG 506 : Provides excellent velvet and intense after feel.  
Also helps to build up viscosity.  
BRB TMS-50I : Act as a film former. Provides colour transfer resistance and long-lasting effect.  
BRB 2836 : Provides emolliency with good compatibility with many organic ingredients. Used for melting wax and cream-to-oil formulation.  
BRB DM 20 : Aids in spreadability. Provides light emolliency to skin.  
BRB PMS-5 : Provides excellent powdery, smooth feel and good lubricity.

#### Procedure

- 1) Add A1-A6 into a beaker and mix well.
- 2) Prepare phase B and add into the beaker. Heat to 90°C and melt completely.
- 3) Prepare phase C and add into the bulk. Homogenise well.

#### Typical properties / Additional information

Appearance : Peach color balm.

### Velvet Matte Lipstick

**Velvet Matte Lipstick** clings to the lips, leaving a uniform coat of colour.

The soft, light texture is highly blendable. It's silky and elegant, make up your lips lightly.

#### Featuring

- BRB 2836 : Provides emolliency with good compatibility with many organic ingredients. Used for melting wax.
- BRB 2835 : Helps to disperse pigments and creates perfect colour coverage.
- BRB Caprylyl Methicone : Used as dispersing medium for colour pigments. Provides unique light and smooth feel.
- BRB PMS-2 : Matte effect with silky touch.
- BRB SG 506 : Provides excellent velvet and intense after feel.
- BRB DM 20 : Aids in spreadability. Provides emolliency to skin.

#### Procedure

- 1) Add phase A into beaker and dissolve by mixing at high shear rotor/stator mixer for 2 minutes. Make sure Bentone gel and BRB SG 506 are homogenise well.
- 2) Add B phase into mixture, heat the mixture app. 90°C and mix well until all waxes completely melted.
- 3) Add phase C into mixture and mix well.
- 4) Add phase D into mixture and mix well. Make sure all powder ingredients completely homogenise into the mixture.
- 5) Add phase E into the mixture and mix well.
- 6) Pour slowly into the mould.

#### Typical properties / Additional information
